

Releasing your iOS branded app

Requisites

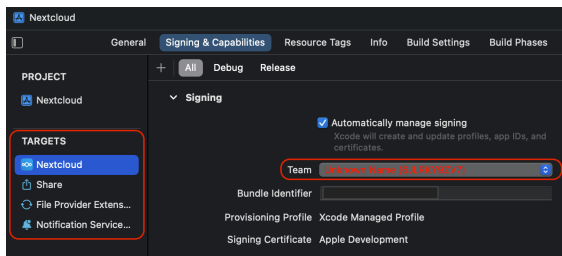

- Apple Developer Program <https://developer.apple.com/programs/>
- macOS device running latest macOS version
- Xcode latest version available (specific versions will be notified)

Release process

1. Unzip the branded Xcode project provided
2. Open the project in Xcode
3. Select “Nextcloud” project in the navigation bar

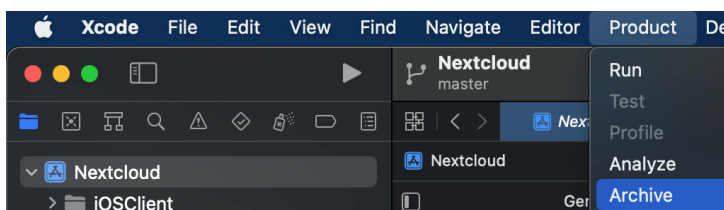

4. Select “Signing & Capabilities” and set your developer team for every target.

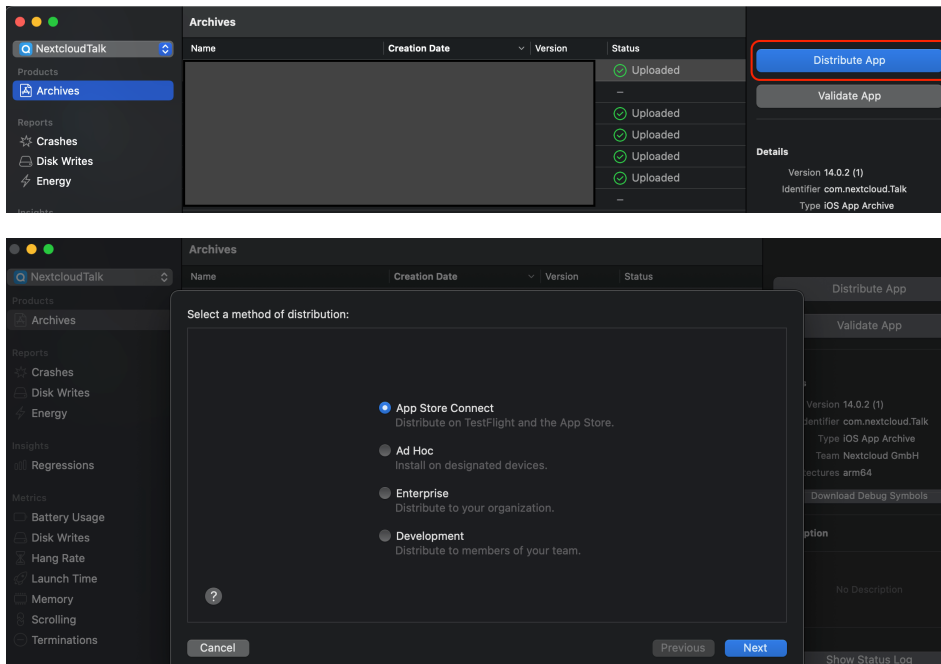

5. (Optional) Select a simulator or a physical device connected to your Mac and build and run the project by tapping on the “play” button.

6. Archive the project

7. Distribute it to the App Store

8. Prepare App Store Connect for your app

- (1) App Store Connect Workflow <https://help.apple.com/app-store-connect/#/dev300c2c5bf>
- (2) Add the app <https://help.apple.com/app-store-connect/#/dev2cd126805>
- (3) Create the version <https://help.apple.com/app-store-connect/#/dev2cd126805>
- (4) Add screenshots and app info <https://help.apple.com/app-store-connect/#/dev2cd126805>
- (5) Publish the app <https://help.apple.com/app-store-connect/#/dev2cd126805>
